

# MODERN SKIN CANCER CARE NOW OFFERS YOU MORE CHOICES

Radiant™ Aura is a smart,  
simple and successful  
alternative to surgery.

In the past, a skin cancer diagnosis  
almost always led to invasive surgical  
treatment—but not anymore.

Modern advances in medical technology  
now offer patients a more comfortable  
and convenient option for successfully  
treating some varieties of non-melano-  
ma skin cancer, including basal cell carci-  
noma and squamous cell carcinoma.

# SKIN CANCER TREATMENT... REDEFINED

PAIN-FREE SKIN  
CANCER CARE  
THAT EXCEEDS YOUR  
EXPECTATIONS

radiant  
**AURA**

## Why choose Radiant Aura?

### SMART.

Unlike surgery, Radiant Aura is completely noninvasive, providing you with a sensible, advanced option for non-melanoma skin cancer treatment.

- None of the typical health risks associated with surgery
- No scarring or loss of function concerns associated with surgery
- Safe, low energy x-ray therapy delivered to **only** the affected areas

### SIMPLE.

Treatments are fast, painless and effectively delivered right in your doctor's office.

- Schedule directly with your dermatologist
- Sessions usually last only one to two minutes while you relax in a comfortable position
- No downtime or discomfort
- Return to your daily activities immediately after treatments

### SUCCESSFUL.

Radiant Aura is a powerful option for treating your skin cancer without surgery, or when surgery is not an option.

- Superior, surgical-quality results
- Highly effective cure rates
- No impact on your busy day-to-day life

### Q. HOW DOES RADIANT THERAPY WORK?

Physicians use a compact, portable machine to target low energy x-ray beams **specifically** at the site of your cancer. Radiant Aura only penetrates superficially, right where it's needed—without affecting healthy skin and underlying tissue. And you can receive treatment in whatever position **you** find comfortable.

### Q. HOW OFTEN ARE TREATMENTS ADMINISTERED?

While your exact treatment schedule will depend on your diagnosis and condition, most Radiant Aura treatments only take a few minutes and are scheduled at your doctor's office, Monday through Friday, for a period of a few weeks.

### Q. ARE THERE ANY SIDE EFFECTS TO RADIOTHERAPY?

Most patients will experience some redness around the treated area, like a sunburn. After your treatment ends, the affected area will gradually heal as new, healthy skin develops underneath it. If you experience additional discomfort, please talk to your doctor or nurse.

Radiation therapy works within cancer cells by damaging their ability to multiply. When these cells die, the body naturally eliminates them.

Healthy cells are not affected in the same manner, as they can grow and repair themselves in a way that cancer cells cannot.

Ask your doctor if Radiant Aura is right for your skin cancer.
